About Me

To Pursue a highly rewarding career, seeking a job in a challenging and healthy work environment where I can utilize my skills and knowledge efficiently for organizational and personal growth.

Technical Skills

Languages: C++, C, Python

Technologies/Frameworks: ROS, ROS2, OpenCV, SLAM, Gazebo, Monte Carlo analysis, RViz, SITL, HITL TensorFlow, PyTorch, Matlab

Control System: PID(Proportional Integral Derivative), MPC(Model Predictive control)

Coursework: OOPS, Data Structures and Algorithms, System Design

Developer Tools: VS Code, Sublime Text, Git/GitHub

Experience

Arka Aerospace, Hyderabad

June 2024 – Present

Robotics Software Engineer (Python, ML, Sensor Fusion, Extended Kalman Filter)

Onsite

- Designed and implemented a **Control System Algorithm** for an autonomous interception drone, encompassing trajectory tracking and path planning to effectively neutralize rogue drones.
- working on **Sensor Fusion** to integrate data from multiple sensors for precise drone positioning in dynamic environments, utilizing advanced filters such as the **Kalman Filter, Extended Kalman Filter, Low-Pass Filter, and Unscented Kalman Filter**.
- Developed a complete **Autonomous Precision Landing Algorithm** for drone's using April tag.

Skye Air Mobility, Gurugram

March 2023 – June 2024

UAS Research and Development Engineer (Python, AWS Iot, opencv, Ardupilot, Dronekit)

Onsite

- Precision Landing Precision Hovering for cm Meter Level Accuracy For Autonomous UAS Delivery.
- 4G Module for UAS System for Continuous Connectivity from the UAS System.
- Autonomous Docking System for Storing Delivery Box Safe.
- Collaborated with cross-functional teams to ensure seamless integration of new technologies into existing systems.
- Developed innovative solutions for complex engineering problems, resulting in improved product quality and reduced manufacturing costs.
- Managed multiple concurrent projects effectively, ensuring all deadlines were met and resources were utilized efficiently.

GNA University, Phagwara

October 2021 – July 2022

Team Vice Caption of GNA Autoignite

Onsite

- Team GNA Autoignite participated in SAE INDIA AUTONOM 2021, made it up to round 3, and secured India 4th Rank. It is a national competition in which we made a completely autonomous car for Indian conditions in IPG Car Maker software, which created Real-time scenarios, and sensor fusion models from scratch.
- Being a Vice Caption of Team GNA Autoignite I Learned a Lot of things, Team Management, Project Management, Leadership, Problem-Solving, and Time Management.
- Being a Vice Caption of Team GNA Autoignite I Learned a Lot of things, and Working With a Team of 10 People, Make the People collaborated on The Project and Solved their Problems to Complete the Project One Time

Education

Gna University Phagwara

July 2019 - May 2023

Bachelor of Technology Mechatronics Engineering

Phagwara, Punjab

Certifications

- Crash Course on Python from **Coursera** [Certificate](#)
- Completed git and GitHub from **Coursera** [Certificate](#)
- Machine Learning Course from Npte **IIT Kharagpur** [Certificate](#)

Soft Skills

- Collaboration
- Creativity
- Problem-solving
- Multi-tasking
- Teamwork
- Innovation
- Critical thinking
- Communication
